## CRUDE OIL SLUDGE PROBLEM? LET PLENTY SIDE ENTRY MIXERS SOLVE IT!

Whether the price per barrel of crude oil is at \$100 or \$30 it is important to utilise Plenty Side Entry Mixers when storing crude oil in large above ground storage tanks.

Basic sediment and water has been around causing operators problems for many years and left alone will cause loss of revenue, loss of tank capacity, pumping problems, corrosion problems and inspection problems in line with API 653.

Plenty Side Entry Mixers feature site proven Shut Off Device (to allow mixer maintenance to be carried out with a full tank of oil) and Rugged, Heavy Duty designs for extended service life is the #1 choice.
